

System Integrator, Risk Technology

Capital One Financial Services is looking for a **System Integrator** to become a key member of our **RiskTechnology Team**

In this role, you'll use your experience to help move the Risk Technology team forward with our Technology agenda by managing the systems that support our Risk Management business partners. You will provide a full-spectrum of technology services from data integration across the environment to exploring new technology capabilities' applications into our domains.

Responsibilities:

- Collaborate with Agile teams in planning, developing, implementing, and supporting new or existing applications
- Formulate and define system scope and objectives based on user needs and thorough understanding of business problems with varying levels of complexity
- Partner with product owners, business partners, and end users to understand business processes and concepts
- Be passionate about technological trends in the market with the ability to leverage them in driving innovation and educate others on how they can be used
- Understanding all pieces of the puzzle so you can see the big picture / end-to-end value stream.
- Finding refined solutions to complex challenges and helping the entire team meet its commitments
- Solicit, analyze, and negotiate customer requirements under minimal guidance and direction
- Provide technical guidance and consult concerning business implications of application development projects
- Identify and address cross-project dependencies and impacts
- Identify risks/issues in a timely manner and appropriately mitigate/escalate
- Educate others on capabilities and constraints of technology platforms
- Experience working both independently and collaboratively to solve problems and deliver high quality results in a fast-paced, unstructured environment
- Experience participating in design, build and testing of system solutions
- Experience in data ETL & lineage
- Experience in logical data modeling
- Experience with full life-cycle cloud-based software implementation activities

Keywords:

system integrator, BSA, Risk Management, Agile, Scrum, cloud, AWS

Basic Qualifications:

- Bachelor's Degree or military experience
- At least 1 years of experience in IT projects
- At least 1 years of experience in system analysis
- At least 1 years of experience in data modeling
- At least 1 years of experience in Big/Fast Data

Preferred Qualifications

- At least 1 years of experience with Risk Management

At this time, Capital One will not sponsor a new applicant for employment authorization for this position.
